

Indoor Conservation Tips

Use your appliances wisely

- Wash only full loads of laundry or use the appropriate water level or load size selection on the washing machine.
- Add food waste to your compost pile instead of using the garbage disposal.
- Use a dishwasher; and when you do, make sure it's fully loaded.
- Scrape dishes instead of rinsing before loading it into the dishwasher.

Fix leaks around your home

- An American home can waste, on average, more than 10,000 gallons of water every year due to running toilets, dripping faucets, and other household leaks .

Bathroom conservation

Over 1/2 of all household indoor water use takes place in the bathroom.

- Shower instead of taking a bath
- Turn off the water while brushing teeth and shaving
- Install a low flow toilet
